

We design and develop in-house software tools and technology to help deliver long-lasting results and provide transparency for project results. Our Community Action Plans are powered by eEthos, our user-friendly Community Action Software. eEthos empowers community leaders and administrators with the data and tools needed for effective planning and decision making.

**Key Platform Modules**

-  **People & Organizations**  
Manages key info for community members, staff, key suppliers and service providers
-  **Community Planning**  
Summarizes and analyses community data for planning and decision making
-  **Assets & Infrastructure**  
Tracks community data, task scheduling and asset management
-  **Energy Management**  
Energy use and generation monitoring and management tools
-  **Financial Management**  
Tracks rents and arrears, inventory, purchasing and links to existing accounting systems

## About Community Power

Working successfully in communities, businesses and homes since 2009, Community Power is a mission-driven team that works alongside Indigenous communities to co-develop and implement custom energy and housing management solutions.

Community Power's unique approach is honed from years of experience working with Indigenous communities and is based on action-oriented recommendations. Since each community has unique energy and housing needs, Community Power uses a holistic approach to learn about the goals and needs of each community, including the past work that has been done in the community and historical barriers to initiatives attempted, and works collaboratively to develop plans that align with their vision.

Over **10 years** of knowledge and experience

Served over **60 Indigenous communities**

Secured over **\$4 million** in funding over last four years

Delivered **over 30** custom projects and programs over the last six years

We work collaboratively with our partner communities to support their unique energy and housing projects every step of the way.

Partner with us today!

## Community Services Offered

### Construction Action Plan™

Our Construction Action Plan involves assessing a community's housing and building needs, planning building retrofits and housing needs, and enabling action and assuring quality of the final build.

#### 1 Assessments

- Community Building Needs Survey
- Community Wide Building & Housing Assessments
- Detailed Building & Housing Assessments
- Local Capacity & Resource Assessment

#### 2 Planning

- New Building Requires Forecast Plan
- Building & Housing Retrofits Upgrade Plan
- Capacity & Resource Development Plan & Renovation
- Construction Policy & Implementation Plan
- Local Business Plan & Feasibility Studies

#### 3 Action

- Construction Management
- Quality Assurance and Inspections

### Energy Action Plan™

Developing an Energy Action Plan includes performing energy efficiency and renewable assessments on community homes, modelling savings and forecasting growth, and performing energy upgrades and inspections.

#### 1 Assessments

- Energy Needs & Goals Assessments
- Community Wide Building Energy Assessments
- Detailed Building Energy Assessments
- Power Generation Opportunity Assessments

#### 2 Analysis & Modelling

- Community Energy Profile Generation
- Energy and Heat Saving Analysis
- Renewable Energy Opportunity Analysis
- Energy Monitoring and Reporting
- Energy Software Modelling and Consulting
- Energy Load Forecasting Analysis
- Heating System Alternatives Analysis

#### 3 Action

- Energy Upgrades
- Energy Inspections, Measurement and Verifications

### Capacity Action Plan™

Empowering and training community members and staff is at the core of the Capacity Action Plan. It includes program administration and maintenance, engaging and educating community members, and providing training for future needs and jobs.

#### 1 Admin & Maintenance

- Energy Efficiency as Part of the Job
- Helping Households Manage Energy
- Climate Change & Resiliency Training
- Community Energy Mentorship
- Annual Inspection Protocol Training
- Implementing Energy Savings Measures

#### 2 Community & Youth

- Energy & Climate Champion / Coach Training
- Youth Energy Mentorship Program
- Energy & Climate Community Education
- Youth Climate Mentorship

#### 3 Trades & Job Seekers

- Energy Inspection Training
- Housing Inspection Training
- Wood Stove Inspection Training
- Mould Inspection Training

### Climate Action Plan™

Our Climate Action Plan is centered around implementing behavioral change to combat climate change. This plan includes identifying climate change markers, mitigating impacts, and building resiliency with the community.

#### 1 Identification & Assessments

- Climate Change Indicators & Assessments
- Climate Change Impact Assessment

#### 2 Mitigation

- Disaster Mitigation Action Plan
- Emissions Reduction Action Plan

#### 3 Resiliency

- Climate Resiliency Assessments
- Building Adaptation Plan
- Climate Adaptation Plan
- Resilient Power Systems
